

ADVANTAGES

- Easy and quick filter change
- Built-in rain protection
- Better pulse cleaning performance
- Positive sealing to eliminate by-pass risk
- Self-cleaning cartridge filters for high efficiency and low pressure drop
- For dust/snow prone areas
- It offers limited flexibility to adapt your filter solution to changing environmental/operational conditions
- Improves engine efficiency & availability with a limited selection of filters

| | |
|-----------------------------|--|
| Application | Arctic environments Desert environments, or areas prone to dust storms |
| Installation Options | A single cartridge filter stage; from M6-E12 efficiency Other features can be added depending on the environment, such as an air inlet cooling system Can be supplied in painted carbon steel or stainless steel Gold Cone or Gold Series filter option for increased media area and pulsing performance Can be supplied with our patented HemiPleat filters |
| Comment | Contact your nearest Camfil office for sizing, staging and configurations choice. Ask us for a Life Cycle Cost evaluation based on your site conditions and/or request an on-site evaluation of your site conditions to validate the required level of protection. |
